Re: New Product Introduction – Baseline Collection - Titmus BC116

The Baseline Collection is the most versatile grouping of frames offered over the entire range of Uvex® safety frames. With over 15 styles, this collection can meet almost any size and style requirement. We are pleased to further expand this collection with the introduction of the **Titmus BC116**. Available in popular colors and styled for today's marketplace, the **Titmus BC116** is sure to sell.

Features and Benefits:

- **Monel front construction:** provides rugged long-lasting wear for trouble free performance.
- **Stainless steel temples:** due to the superior strength of stainless steel, the temples are slimmer and lighter for more comfortable wear.
- **Proven color choices:** available in gunmetal and brown, two highly popular men's colors, the Titmus BC116 will prove to be a strong seller.
- **Styled for today:** featuring a slim and modern design, the Titmus BC116 will please the wearer who wants a clean and contemporary look.

Like all Uvex® Rx products, these frames meet the latest ANSI Z87.1 Standard
