Re: New Product Introduction – Standard Collection – Titmus SC915

The Standard Collection represents safety designs that are focused on high value at a low cost. These designs are all about function and attributes with safety as the overriding concern. And, now, we are introducing our latest design, the SC915, with excellent features and benefits:

1. Injection molded fronts and temples ensure consistent dimensioning for un-wavering performance.
2. A modified rectangle shape is perfect for today's market and will accommodate a full range of Rx's including the increasingly popular progressive lens designs.
3. Propionate fronts are mated to polycarbonate temples for a lightweight fit and robust functionality.
4. The temples do not have metal corewires which reduces the exposure in electrical environments, reduces weight for increased comfort and may be suitable in some specialty markets (they are also the same temples used on the SC910).
5. A three millimeter spread between the small eyesize and the larger one contributes to a wider range of fit for end users guaranteeing increased placements.
6. **Note!** The SC915 comes with a wider nasal angle along with adjustable nose pads to better accommodate flatter nasal features as well as providing a more flexible fitting opportunity.

Like all Uvex Rx products, the Titmus SC915 meets the ANSI Z87.1 - 2003 Standard.

Description	Sizes	Colors	Suggested Resale Price
Titmus SC915 *	51.19.140	Brown	\$19.99
	54..21.145	Gray	
Replacement Temples	140 and 145	Gray or Brown	\$9.99
Integral Shield Design	Yes	Gray or Brown	NA

* Sold assembled only.
